

## Plumbers Putty – How to Use

### Application:

Plumbers putty is for setting frames, faucets, strainer baskets etc.

1. All surfaces must be clean dry and free from hardened putty, loose scale, dirt, wax, oil or grease.
2. Soften putty by making a ball and roll between the palms of your hands for 1-2 minutes.
3. Spread liberally to insure a perfect seal, install fixture and then wipe away excess. Excess may be returned to the container for future use.

### Restrictions and Cautions:

Plumbers putty contains oil. Do not use on marble, granite, plastics or any porous surfaces. A silicon caulk or Hercules Sta-Put Ultra putty is formulated for those surfaces.

Do not store near oxidizing agents, acid, or extreme heat. Plumbers putty is not considered hazardous within the context of OSHA 29 CFR.1200. Please refer to the Material Safety data sheet for further information.
